

Strangeloop AS1000 Application Scaling Appliance Wins Network Products Guide Reader Trust Award for Best in Optimization

AS1000 Selected a 2009 Best Products and Services Winner In Application Optimization

Vancouver, British Columbia – May 21, 2009 – Strangeloop Networks™ Inc., a leading provider of solutions that automatically accelerate web sites and web-based applications, announced today that Network Products Guide, industry's leading publication on information technologies and solutions has named the AS1000 Application Scaling Appliance a winner of the 2009 Best Products and Services Award. This respected annual award honors products and services that represent the rapidly changing needs and interests of the end-users of technology worldwide. As part of the tech-industry's leading global awards program, this year's Best Products and Services were nominated from all over the world.

The Strangeloop AS1000 appliance is the only solution on the market to automatically optimize web applications developed using the Microsoft ASP.NET framework. It sits in-line between a company's web servers and the network, and automatically optimizes ASP.NET and AJAX traffic, in real-time, with minimal changes to code, datacenter or network infrastructure. At the heart of the Strangeloop AS1000 lies Strangeloop's Choreography Engine™ – a heuristic tool that applies computing resources to key areas of ASP.NET and HTML performance and scalability problems. It collects and analyzes traffic flow and data, and combines this real-time knowledge with optimization techniques to automatically execute acceleration treatments.

"Increased end-user awareness and ongoing advances in technology are helping shape better products and services," says Rake Narang, editor-in-chief, Network Products Guide. "Strangeloop's AS1000 is easily and efficiently optimizing in the speed and performance of web applications - ultimately improving end-user satisfaction - a critical component to a company's success."

"These awards go to the best technology products every year and we are honored that the AS1000 has gained the Network Products Guide Reader Trust," said Jonathan Bixby, chief executive officer of Strangeloop Networks. "We are committed to meeting our customer needs by providing them with the best products and services."

About Network Products Guide Awards

Network Products Guide is a media sponsor of Interop Las Vegas and New York and Technosium Executive Forums engaging Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs). As industry's leading technology research and advisory publication, it plays a vital role in keeping decision makers and end-users informed of the choices they can make in all areas of information technology. You will discover a wealth of information and tools in this guide including the best products and services, roadmaps, industry directions, technology advancements and independent product evaluations that facilitate in making the most pertinent technology decisions impacting business and personal goals. The guide follows conscientious research methodologies developed and enhanced by industry experts. To learn more, visit www.networkproductsguide.com

About Strangeloop Networks

The Strangeloop Networks products accelerate dynamic web applications with unique, framework-specific solutions that require minimal changes to software coding and hardware infrastructure, freeing developers to focus on providing enterprises with value-added features. With the Strangeloop AS1000 Application Scaling Appliance for Microsoft ASP.NET and AJAX and the Strangeloop WS1000 Web Services Accelerator, enterprises dramatically shorten code cycles, improve application performance and throughput, more efficiently use bandwidth, achieve greater return on their investment in information technology (IT) staff, network and computing resources and boost customer satisfaction. Strangeloop is based in Vancouver, B.C. For more information, visit www.strangeloopnetworks.com.
